Carvelobox

Carvelobox makes carvelo even easier to use

In the standard setup, a host manages a carvelo from our fleet and occasionally hands it over to users. This provides positive visibility and personal customer contacts. However, it also requires staff resources for pickup and return and restricts use to opening hours.

These limitations can be overcome with our **Carvelobox**. Users can collect their rented carvelo independently from a secure locker.

The locker contains the key, charger and battery. The battery is automatically recharged after each rental.

The latest generation of Carveloboxes is **fully connected and can be opened directly via the app** thanks to an automated locking system.

Benefits of the Carvelobox

- 24/7 access
- No waiting time for pickup
- Practical and efficient
- Easy to install
- New carvelo locations can, where appropriate, be financed through a suitable partnership with carvelo

Carvelobox

Installation requirements

Wall-mounted housing or freestanding pillar:

The standard Carvelobox configuration is a wall-mounted housing. However, each request is assessed individually and we aim to find the best solution for every location.

The ideal location offers:

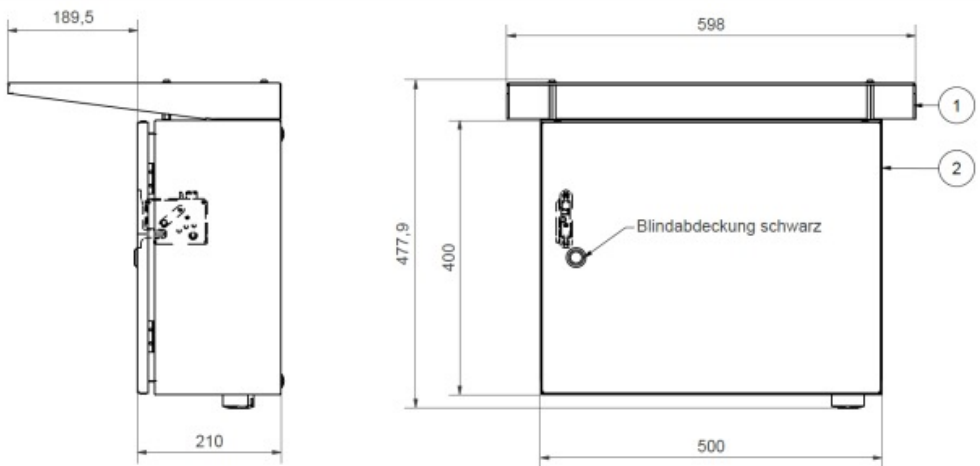

- Shelter from weather conditions, at least partially covered.
- Parking space for the carvelo nearby, ideally also covered.
- Easy access to the power grid (230 V, max. 4-6 A for the charger).
- Reliable mobile network coverage on site.

- Underground parking locations may be possible subject to testing mobile connectivity.

The antenna and emergency access point (for example, key access in the event of a power outage) are located underneath the housing and must remain accessible.

Dimensions

A standard Carvelobox housing measures 500 mm (width) × 400 mm (height) × 210 mm (depth). The total width depends on the number of compartments required. An additional canopy may be installed, particularly for freestanding pillar installations.

Carvelobox

Pricing and conditions

Standard Carvelobox: **CHF 2'490 including VAT and delivery**

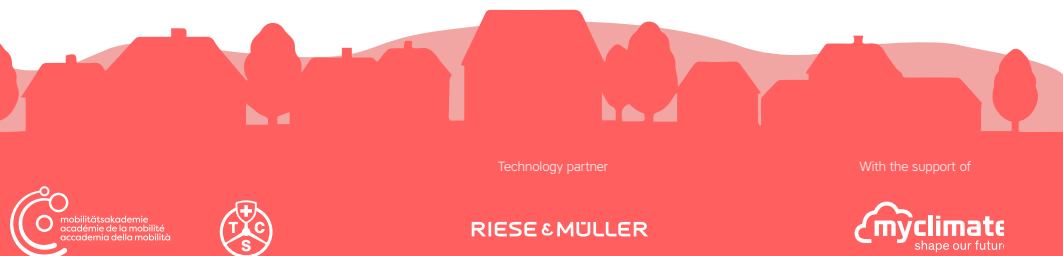

Annual SLA fee: **CHF 150 including VAT**

For special configurations, such as multiple compartments or freestanding pillar installations, please contact us for a customised quotation.

The Carvelobox is delivered directly to the requested address. Ownership of the box is transferred to the partner.

Installation

Installation costs are borne by the partner. carvelo provides plans, technical installation instructions and advice regarding the location. If required, we are happy to recommend electrical installation partners.
