Why carvelo?

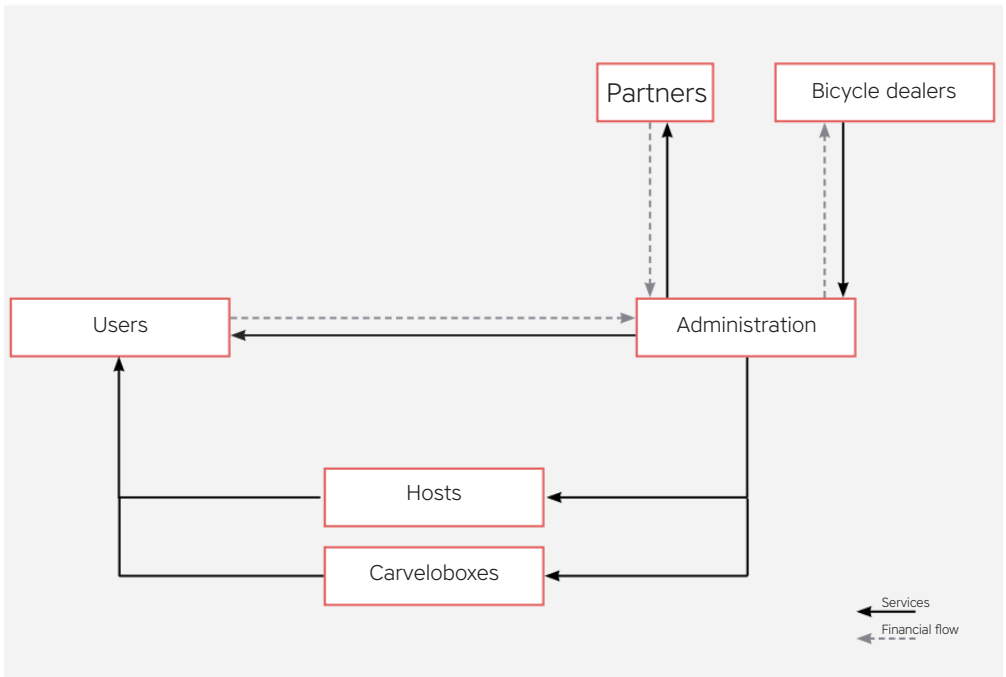

Carvelos are easy to rent and highly versatile. They can make a significant contribution to sustainable and efficient mobility.

Carvelo rental locations form a dense network across more than 100 Swiss cities and municipalities. Thanks to this excellent accessibility and a convenient booking system, over 45,000 users regularly take advantage of the service.

With their large cargo area and powerful electric motor, carvelos provide transport capacity comparable to a small car. They are particularly useful for families and can be used for a wide range of purposes, including shopping, running errands, leisure activities and transporting children.

How does carvelo work

The success of carvelo is based on a dense network of hosts. By providing users with the key and battery, hosts benefit from an environmentally conscious, innovative and future-oriented image.

Two operating models are available:

„carvelo with an operating fee“, mainly intended for businesses and residential developments
„carvelo for sponsors“, primarily aimed at sponsoring partners and municipalities

Hosts with limited opening hours or staff resources can choose the „Carvelobox“ solution. This allows users to pick up their rented carvelo independently from a secure locker.

Using carvelo is simple and convenient: users download the app, register, book a nearby carvelo at an affordable hourly rate, collect it (including a short introduction if required), use it and then return it after their trip.

Carvelos are equipped with a powerful electric motor that effortlessly moves even heavy loads. They are co-funded by partners and maintained and repaired by local bicycle dealers.

The TCS Mobility Academy operates the carvelo administration and customer service. This relieves hosts of all administrative tasks, including fleet management, rentals and hotline support.

Pricing models and services

The two available operating models allow partners to choose the solution that best suits their needs and benefit from different advantages.

	Sponsor	Operating fee
Annual price (CHF)	2'700	3'300
Choice of model (Transporter 65 or 85)	✗	✓
User hotline	✓	✓
Custom branding	✓	✓
Comprehensive insurance coverage	✓	✓
Location search for the carvelo	✓	✗
Active communication and promotion	✓	✗
Service, maintenance and repairs	✓	✓

About Us / Contact

CARVELO IS THE LARGEST ELECTRIC CARGO BIKE SHARING PLATFORM

carvelo is a service offered by the TCS Mobility Academy and Touring Club Switzerland. Through the sharing platform, electric cargo bikes („carvelos“) can be rented in just a few simple steps.

The service works similarly to Mobility Car-sharing: carvelos can be rented by the hour and are available for pickup from local hosts in neighbourhoods across Switzerland.

A carvelo can be used to transport goods weighing up to 100 kg or up to two children.

Today, more than 400 carvelos are available for rent in over 100 Swiss cities and municipalities.

In 2021, carvelo expanded its offer with a rental service for electric mini vans. This pilot project operates under the name „smargo“ (short for „Shared Micro Cargo“).

We look forward to hearing from you and welcome your questions and suggestions.
