carvelo

A positive image and new customer contacts

As a carvelo host, you benefit from a positive image among your customers, business partners and the general public. You position yourself as an innovative, sustainable and forward-looking organisation.

All you need to do is host a carvelo, take care of a few simple operational tasks and hand it over to users. Everything else, including fleet management, rentals and customer support, is handled by the carvelo team.

There are no costs for you as a host.

Your tasks as a carvelo host

- Hand over the key and battery to users (typically no more than 3 to 5 times per week).
- Recharge the battery between rentals.
- Provide feedback to our team about day-to-day operations.

Your benefits as a carvelo host

- Position your organisation as environmental-ly conscious, innovative and future-oriented.
- Carvelo branding including your business address.
- Communication support with images, text modules and flyers.
- Visibility through carvelo communication channels (logo in our app, mentions on our website and in our newsletter, host profiles and social media features).
- New customer contacts.
- Free use for your own transport needs (up to 25 hours per month).
- 24/7 access to your own carvelo.
