carvelo

carvelo with an operating fee for residential communities and businesses

Do you work for a company that would like to use an electric cargo bike („carvelo“) featuring its own branding? Are you willing to share the carvelo with other businesses and local residents? Or are you involved in a neighbourhood association or working for a housing cooperative? Would you like to share an electric cargo bike with the residents of your community?

In all of these situations, and many more, „carvelo with an operating fee“ is the ideal solution for providing your community with a CO₂-free mobility tool for shopping, recycling and leisure activities.

You decide how much you want to invest in a carvelo with your own branding, and you may even generate additional income. At the end of each year, we reimburse you with 50% of the rental revenue generated.

What we offer

- Free choice between the Riese & Müller Transporter 65 (standard carvelo model with child seats) and the Transporter 85.
- Professional operation of an electric carvelo at your location (maintenance, repairs, servicing and customer support).
- Comprehensive insurance coverage.
- Custom branding of the carvelo according to your specifications and our branding concept.
- Rental of the carvelo via the carvelo platform (website and app), either for a closed user group or publicly accessible, in both cases at the standard carvelo rates.
- Unlimited free hours for your own use.
- Optional Carvelobox solution providing automated 24/7 access and making pickup and return as simple and convenient as possible.

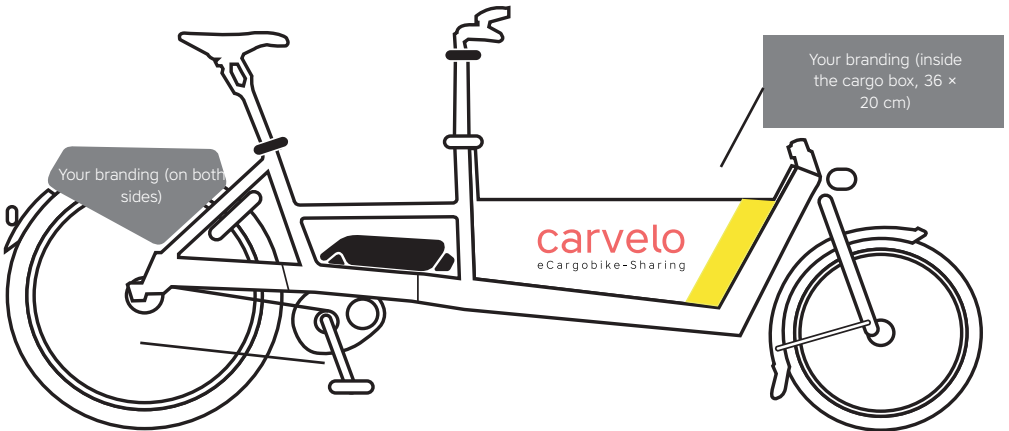

carvelo

Pricing model

You pay an annual fee of **CHF 3,300 (VAT included)** in advance. At the end of the year, we reimburse 50% of the rental revenue generated.
